

oona 22 - New age of contactless checkout

The android powered self-service kiosk

The oona 22 devices can be built-in into any self-service or self-checkout system (ordering terminals, cash-register in supermarkets, ticketing systems for public transportation or ATMs in banks, etc.), allowing contactless payment directly on the device screen.

High-Performance front-facing NFC-Antenne

Frictionless, convenient and intuitive payment processes are the future of contactless payment. With oona directly on the screen.

Enterprise durability and ruggedization

The oona 22 robust device is made for all-day operation. With the strengthened glass design, the use is also suitable in more harsh environments. The cleaning of oona devices with professional or household cleaners is possible.

Various built-in options

oona 22 can be mounted in a various and flexible ways, you can select countertop mounts or floor stands which use standard VESA 75 or 100 mounts or build fully custom solutions mounting your screen in furniture or walls using screws along the screen edges. Select needed accessory and build your own solution.
